AI-Supported Facilitation Strengthens the Digital Group Experience

The AI Companion supports facilitators in real time while preserving participant-led Socratic discussion.

Live digital Conversation Map® session with embedded AI Companion

REAL-TIME FACILITATOR SUPPORT

The AI Companion listens, interprets and assists

1 Listen

Monitors the live conversation and participant cues.

2 Prompt

Surfaces relevant facts and suggested Socratic follow-ups.

3 Support

Offers response guidance while the facilitator remains in control.

More consistent facilitation—without replacing human judgment.

Product interface shown for illustrative purposes.
